

# Smart Meet

---

## **Short Summary of your meet !!!**

if we could actually make this text blue. same level as our index.html but say it. dragged this in here. it's blue if your text is in blue make. not that bright blue but it's exactly. the paragraph tag to be italic well we. inside of this tag and so we'll close. to this div and so we can say div class. we can select in CSS and that's an ID. do a quick unordered list and basically. italic now we use our italic class twice. and inside of this div will put hello.
